

Luxury Spoiler Sunroofs

SKYROOF® 860 features a full full wrap interior for a factory finished look. The built-in rolo shade works independently of the glass so you can conveniently block the sun while the sunroof is open or vented.

SKYROOF® 860 electric spoiler sunroofs vent like a pop-up, and slide open like many factory power sunroofs. A low profile composite frame, flush finish, curved leading edge, dark tinted glass and neatly trimmed interior make SKYROOF® 860 spoiler sunroofs look built-in, not bolted on. Generous 20x34 size makes it the perfect fit for a wide range of cars, cross-overs, trucks and sport-utility vehicles. SKYROOF® 860 sunroofs provide luxury features at a moderate price.

Full width rolo shade.

SKYROOF® 860 features advanced electronic control for single touch express open/close, obstruction auto-reverse and auto-close after ignition off. Vent it, slide it, close it. Simply touch a button!

vent it

slide it open

close it

SKYROOF® 860 Spoiler Sunroofs provide convenient operation, practical features, and quality construction for a great value. *Get yours today, and let the Sun slide in to enjoy the great pleasures of open-air driving.*
